Appl. Statist. (2004)
53, *Part* 4, *pp.* 667–669

Index of authors, volume 53, 2004

Aanes, S. See under *Hirst, D.*
Aitken, C. G. G. and Lucy, D. Corrigendum: Evaluation of trace evidence in the form of multivariate data 665
Aitken, C. G. G. and Lucy, D. Evaluation of trace evidence in the form of multivariate data 109
Al-Awadhi, F., Jennison, C. and Hurn, M. Statistical image analysis for a confocal microscopy two-dimensional section of cartilage growth 31
Allemani, C. See under *Berzuini, C.*
Allison, D. B. See under *Beasley, T. M.*
Arjas, E. See under *Härkänen, T.*
Baldi Antognini, A. and Giovagnoli, A. A new 'biased coin design' for the sequential allocation of two treatments 651
Barone, P. See under *de Pasquale, F.*
Beasley, T. M., Page, G. P., Brand, J. P. L., Gadbury, G. L., Mountz, J. D. and Allison, D. B. Chebyshev's inequality for nonparametric testing with small N and α in microarray research 95
Berger, K. I. See under *Scott, M. A.*
Berger, M. P. F. and Tan, F. E. S. Robust designs for linear mixed effects models 569
Berzuini, C. and Allemani, C. Effectiveness of potent antiretroviral therapy on progression of human immunodeficiency virus: Bayesian modelling and model checking via counterfactual replicates 633
Bingham, D. R., Schoen, E. D. and Sitter, R. R. Designing fractional factorial split-plot experiments with few whole-plot factors 325
Brand, J. P. L. See under *Beasley, T. M.*
Brazzale, A. R., Salvan, A. and Roletti, S. A hierarchical modelling approach for measuring reliability of and agreement between two types of magnetic field dosimeter 261
Brown, T. See under *Oh, H.-S.*
Bullmore, E. T. See under *Landau, S.*
Catchpole, E. A., Morgan, B. J. T. and Coulson, T. Conditional methodology for individual case history data 123
Caussinus, H. and Mestre, O. Detection and correction of artificial shifts in climate series 405
Chakraborti, S., van der Laan, P. and van de Wiel, M. A. A class of distribution-free control charts 443
Charbonneau, P. See under *Oh, H.-S.*
Coulson, T. See under *Catchpole, E. A.*
Crowder, M. See under *Stephens, D.*
Cruz-Medina, I. R., Hettmansperger, T. P. and Thomas, H. Semiparametric mixture models and repeated measures: the multinomial cut point model 463
De Gruttola, V. See under *Foulkes, A. S.*
De Santis, F., Perone Pacifico, M. and Sambucini, V. Optimal predictive sample size for case–control studies 427
Eisele, J. See under *Gasparini, M.*
Ellison-Wright, I. C. See under *Landau, S.*
Faller, D. See under *Müller, T. G.*
Fitzmaurice, G. See under *Lipsitz, S.*
Fitzmaurice, G. M. See under *O'Brien, L. M.*
Foulkes, A. S., De Gruttola, V. and Hertogs, K. Combining genotype groups and recursive partitioning: an application to human immunodeficiency virus type 1 genetics data 311
Frommer, D. J. See under *Lloyd, C. J.*
Gadbury, G. L. See under *Beasley, T. M.*
Gasparini, M., Nusser, H. and Eisele, J. Repeated screening with inspection error and no false positive results with application to pharmaceutical pill production 51
